1. Identification of the product and of the company

1.1 Product identifier
Oval Insulated Fire Sleeves

1.2 Identified use of product
Designed to be fitted within electrical switch and socket boxes installed in fire rated walls.

1.3 Details of supplier
ROCKWOOL® Pencoed, Bridgend, CF35 6NY
Tel: 01656 862621 Fax: 01656 862302
Email of person responsible: sds@rockwool.com

1.4 Emergency telephone number
ROCKWOOL® Ltd Customer Support 9am-5pm
Tel: 01656 862621 Email: SDS@rockwool.com

2. Hazards identification

2.1 Classification of the substance or mixture
Classification according to Regulation (EC) No 1272/2008 [CLP/GHS]:
The product is not classified according to CLP regulation.

Classification according to Directive 67/548/EEC or 1999/45/EC:
Not classified.

2.2 Label elements
Labelling according to Regulation (EC) No 1272/2008 [CLP/GHS]:
The product has not been classified and marked in accordance with Regulation (EC) No 1272/2008.

Supplemental hazard information (EU):
These products contain low bio-persistence mineral fibres.

These products are not hazardous in the form in which they are shipped by the manufacturer. However, they may produce low levels of fibre-containing dust as a result of downstream activities such as cutting.

2.3 Other hazards
Mild mechanical irritation to skin, eyes and upper respiratory system may result from exposure, however any effects are usually temporary.

3. Composition/information on ingredients
These products are made from varying amounts of low bio-persistence mineral fibres, organic fibres and binders.

4. First aid measures

4.1 Description of first aid measures

General information:
The main hazards arise from downstream activities such as cutting.

Following inhalation:
Avoid breathing dust. If breathing difficulties are experienced whilst cutting, remove to fresh air or a ventilated area and seek medical advice.

Following skin contact:
If possible, vacuum excessive dust from clothes as well as skin and hair. Wash and clean contaminated skin with soap and clean water. Clothes should be washed professionally.

Following eye contact:
In case of eye contact, irrigate abundantly with water. Seek medical attention.

Following ingestion:
If small quantities are ingested, seek medical advice.

Self-protection for first aider:
Wear suitable personal protective equipment to avoid inhaling dust.

4.2 Most important symptoms and effects, both acute and delayed

Symptoms:
No symptoms expected.

Effects:
No effect expected.

4.3 Indication of any immediate medical attention and special treatment needed

Notes for doctor:
None required.

Special treatment:
None required.
5. Firefighting measures

5.1 Extinguishing media

Suitable extinguishing media: Not flammable.

Unsuitable extinguishing media: Not applicable.

Special hazards arising from the substance or mixture
Hazardous combustion products: None

Advice for firefighters: None required.

6. Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

For non-emergency personnel:
Avoid inhaling dust.

Protective equipment: Protective clothing should be provided for operators along with protective equipment shown in Section 8.

Emergency procedures: None required.

For emergency responders:
Avoid inhaling dust.

Personal protective equipment: Protective clothing should be provided along with protective equipment shown in Section 8.

6.2 Environmental precautions

Remove dust by using a vacuum cleaner fitted with ‘H’ type filters. Where vacuum cleaning is not possible, dampen down dust and collect whilst still damp. Suitable bags are required for disposal.

Dust should be packaged into impermeable plastic sacks which should be sealed. Such waste should then be disposed of according to local regulations.

6.3 Methods and materials for containment and cleaning up

For containment:
Dampen down any dust spillages as soon as possible and collect whilst still damp.

For cleaning up:
Remove dust using vacuum with ‘H’ type filters and suitable bags for containment.

Dust should be packaged into impermeable plastic sacks which should be sealed. Such waste should then be disposed of according to local regulations.

6.4 Reference to other sections
Section 7 for Handling and Storage and Section 8 for Protective Equipment.

7. Handling and storage

7.1 Precautions for safe handling

Protective measures: No special protective measures are normally required.

Advice on safe handling: Normal safe precautions for handling can be employed.

Fire prevention: Products are not flammable.

Aerosol and dust generation prevention: Small amounts of dust may be generated if products are allowed to abrade against each other.

Environmental precautions: No special precautions are required.

Advice on general occupational hygiene: Wear protective clothing.

Requirements for storage rooms and vessels: Dry location.

7.2 Conditions for safe storage, including any incompatibilities

Technical measures and storage conditions:
Both un-cut and cut products should be packed to prevent movement and abrasion during transit and to prevent absorption of water. Otherwise normal safe precautions for storage can be used.

To avoid damage and distortion, store on a smooth level surface, in a fully supported position off the ground and in a dry place.

Packaging materials: Card cartons.

Requirements for storage rooms and vessels: Dry location.
7.3 Specific end uses

Recommendations:
N/A

Specific end uses:
See references to dust hazards during cutting, Section 4.

8. Exposure controls/personal protection

8.1 Control parameters
Reference should be made to local and country-specific occupational exposure limits for dust and low bio-persistence mineral fibres.

UK monitoring methods can be found as follows:

MDHS 14/4: General methods of sampling and gravimetric analysis of thoracic and inhalable aerosols.

MDHS 59: Machine-made fibres airborne number concentration and classification by phase contrast light microscopy.

NIOSH 0500: Particulates not otherwise regulated, total.

NIOSH 0600: Particulates not otherwise regulated, respirable.

NIOSH 7400: Asbestos and other fibres by PCM.

8.2 Exposure controls
Fit and use appropriate local exhaust ventilation systems for cutting and machining operations.

Maintain a clean workspace using a vacuum cleaner.

10. Stability and reactivity

Section 10: Stability and Reactivity:

10.1 Reactivity:
Stable and non-reactive.

10.2 Chemical stability:
Stable and inert.

10.3 Possibility of hazardous reaction:
None

10.4 Conditions to avoid:
None

10.5 Incompatible materials:
None

10.6 Hazardous decomposition products:
None
11. Toxicological information

11.1 Information on toxicological effects
Exposure is mainly due to low levels of dusts generated during downstream activities such as cutting.

Low bio-persistence mineral fibres as used in these products have been developed to be quickly and effectively cleared from lung tissues.

11.2 Acute effects

Acute Inhalation Toxicity:
Nose and throat irritation

Skin Irritation:
Mild irritation

Eye Irritation:
Irritation

11.3 Chronic effects

Respiratory or skin sensitisation:
Irritation of both the respiratory tract and skin is by mechanical means and is not the result of an allergic reaction or chemical damage.

12. Ecological information

12.1 Toxicity
The product is insoluble in water and remains stable over time. The major constituents are similar in their chemical composition to naturally occurring materials and minerals.

12.2 Persistence and degradability
Not established.

12.3 Bio-accumulative potential
Not established.

12.4 Mobility in soil
No information available.

12.5 Results of PBT and vPvB Assessment
These products do not contain substances that are considered as either PBT or vPvB.

12.6 Other adverse effects
No other additional information available.

13. Disposal considerations

13.1 Waste treatment methods

Waste treatment options:
Waste from these products may be disposed of in landfill according to local regulations

14. Transport information

14.1 UN number
Product is not dangerous according to current transport regulations.

14.2 UN proper shipping name
N/A

14.3 Transport hazard class(es)
N/A

14.4 Packing group
N/A

14.5 Environmental hazards
N/A

14.6 Special precautions for user
N/A

14.7 Transport in bulk according to Annex II of MARPOL 73/78 and the IBC code
N/A

15. Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

EU regulations:

The 7th Adaptation of Technical Progress (ATP) to Regulation (EC) No 1272/2008 was published on 15th July 2015.

Worker protection:
In accordance with the following directives and their amendments:

15.2 Chemical safety assessment
Available on request.

16. Other information

16.1 Indication of changes
All sections updated 23rd March 2017.

16.2 Abbreviations and acronyms
None used.

16.3 Key literature references and sources of data
See main sections.

16.4 Classification for mixtures and used evaluation method according to regulation (ec) 1207/2008 [CLP]
See Section 2.

16.5 Relevant R-, H- and EUH phrases (number and text)
N/A

16.6 Training advice
Please contact ROCKWOOL for further information.

16.7 Further information
