NBS Specification: ROCKWOOL FIREPRO® Linear and Trapezoidal Firestops

PRODUCT SUMMARY:
A range of strips and pre-shaped blocks for fire-stopping joints.

PRODUCT GENERAL DESCRIPTION:
A range of strips and pre-shaped blocks of ROCKWOOL high density stone wool insulation for firestopping gaps at the top of fire resistant walls to the underside of floor and roof constructions. ROCKWOOL has expertly developed Linear and Trapezoidal Firestop Systems to provide fire resistance at the junctions of compartment walls and floors, with a product solution tailored to suit various profiles. Part of the ROCKWOOL FIREPRO© range, this product provides solutions to a wide range of construction elements including masonry walls with a density of at least 400 kg/m³, as well as ensuring both fire integrity and insulation criteria for concrete decks, composite decks and simple profiled sheeting.

FEATURES AND BENEFITS:
• Up to 4 hours fire resistance.
• Suitable for walls ranging from 400 kg/m³.
• Manufactured to suit a wide range of profiles.
• Easy installation.
• Minimizes acoustic flanking transmission.

APPLICATION:
Linear and Trapezoidal Firestop Systems have been developed to provide up to 4 hours firestopping at the junctions of compartment walls and floors.

PRODUCT SPECIFICATION CLAUSE

PRODUCT REFERENCE:
ROCKWOOL Linear Firestop 2A
ROCKWOOL Trapezoidal Firestop 2B to suit (insert deck type)

PRODUCT PROPERTIES:
Standards: BS 476-20
Fire rating: [d] up to EI 240 fire resistance

Thickness: 15mm - 60mm
Width: 75mm - 200mm
Length: 1000mm
* Note: Trapezoidal Firestops are manufactured to suit the profile of the deck at 1000mm lengths
