

ROCKWOOL Prefab Building Systems

10 April 2024

CONFIDENTIAL | PBS | ROCKWOOL A/S

Why prefab?

Enables much faster construction on-site

Enables industrialised production process

Reduces weather-related risks in construction

Addresses shortage of skilled labour

Rockzero - the load-bearing wall is made of stone wool

The wall consists of a few thin steel profiles, an OSB board and
and
a lot of stone wool!

Rockzero - from the stone wool walls to the complete house

ROCKWOOL
sales value
typically
**5-10 times
higher**
with a Rockzero
house than
a traditional
house

Eight benefits of Rockzero

1. Short construction time

2. Circular and sustainable

3. Thermal performance

4. Exceptional fire safety

5. Noise insulation

6. Airtight and vapour open

7. High design flexibility

8. Strong, slim, light weight

Project example: the Netherlands

27 specialty
care homes

2023

Project example: Denmark

Senior homes
2023

Project example: Denmark

House in
Fredensborg
2023

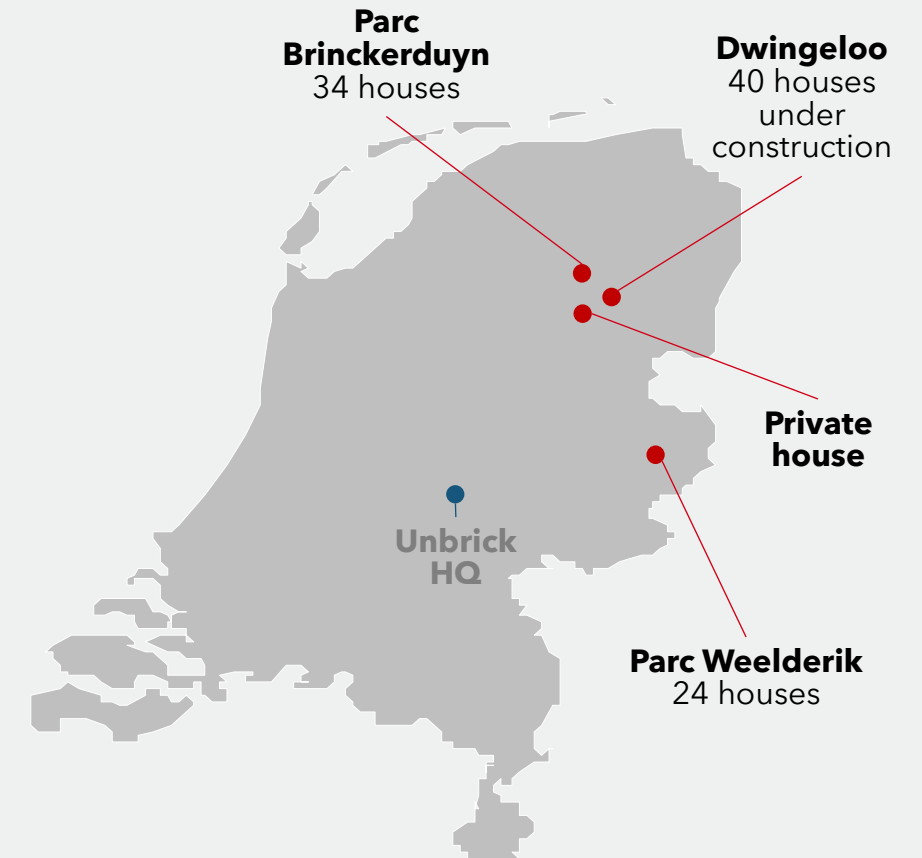

Partner example: Unbrick in the Netherlands

Unbrick makes holiday parks based on standardised Rockzero houses

Unbrick holiday parks in the Netherlands

Next 24 under development
Location not yet known

Partner example: ImagineHome in the Netherlands

Imagine

Imagine is a real estate developer in the Netherlands addressing modern market needs

450

houses built
so far
with the
Rockzero
system
